Why does THE CITIZEN object to Gen. Marquez being protected by the officers of this city during his stay here? He is in Tucson just as any other transient guest, and if his life is in jeopardy, as was the case Saturday vening, why should we not protect him?

The above is from the Record of this morning. The Record must surely know that Marquez is not " in Turson just as any other transient guest." He is here to obtain and in advance of land piracy, just the same as if a privateering ship operating against the and engaged in open treason against in that district. Now that victory has nished from which to manufacture their own country. That Marquez crowned Superintendent McCufferty's silver bricks.

We again insist that if Marquez is to have the projection of our officers, also learn that the late developments he should abandon his piracy on So- in the Tough Nut and Good Enough nora. He must bear in mind that his claims of their group are larger and work in this respect, is the extreme opposite of excusable warfare.

The Coming Hoofing Match.

The carpenters will commence tomorrow morning to lay the track for the three-days walking match to commence on Saturday evening next. Leslie Blackburn is managing the contest, which fact insures a success from the word go. The County Surveyor will lay out the track, and enough scorers will be appointed to preclude the possibility of fraud. Five a-piranis for go as you please glory have knocked the figurative chip off the shoulder, and will brave the awful horrors of skinned heels and other at. tendant asiser's for the " fruit " to be enjoyed by the winner. The number will probably be increased Juring the week. As in the successful matches under Blackburn's management in San Francisco and other cities, due precaution will be taken to ensure such order that no one may be hindered from attending and vicuessing the fun.

The Excuse.

By authority of Mr. W. A. The other two companies, the names of which I do not remember, run their lines direct from Benson, the point of connection with the Southern Pacific Railroad, to Tombstone, ignoring mines and mills in their hot haste to obtain a short line to the great Tombstone. I happened, in response to a pressing invitation, to find my elf in a law court last Monday, when a curious mode of cheating at fare was shown. The game is played thus: Thirteen cards are spread out on a table, that is to say, an entire suit. A pack of cardarthrofiled by the banker, then cut by a player, when the banker proceeds draw the cards, one after another from the pack, first removing one. If a player puts a stake upon any one of the cards which have been laid out upon toe table, he wins, provided its equivalent is an odd card in the pack, and he loses if it is an even one. Now, it seems impossible that a player could cheat the banker. This is, however, how it is done: In shuffling the banker generally shows the bottom card. Tueson Directory, and our citizens he hands the pack to be cut the player should give them every facility for cass an even number of cards, so that when the cut is put back by the banker the player knows that what was the curacy.
